OCTOBER HIGHLIGHTS

Vet Assisting 2 students have been working on creative projects to help them learn medical terms used for Directional anatomy as well as creating 3-D models of skin. Slowly moving into their new lab space and looking forward to taking in clients for routine grooming needs. Keep an eye and ear out for more information about how you can sign up for these services.

We have had several visitors talking about experiences from after high-school to tips for being successful in class as well as life after high-school. Our students have learned about Pet Insurance from Truepanian, Sam Bryja, Alumni from our first class in 2016-17 spoke of her experiences with Uofl and the application process for Veterinary School. Alumni from 22-23 school year spoke to us about their service in National Guard and how our program has helped advance their confidence. VA2 students have volunteered with Wish upon a Rescue in Lockport and will be completing volunteer orientation at Legacy Ranch in November. We will also be bringing a group of students to the BUILD conference in November.

Vet Assisting 1 students have survived their first assessment with fairly high marks. We will be having our Unit 3 Assessment on Thursday, November 16th. Please remember that all assignments are posted on Google Classroom and Live announcements can be watched between 6:30am and 7:30am to see what the day will hold.
